

Clontarf Energy Plc is an Emerging Oil & Gas Exploration & Production Company focused on Africa and South American

FACT SHEET

At a glance

Clontarf Energy plc is an emerging oil and gas, exploration and production, company focused on South America and Africa. The company's experienced team has a successful track record in exploration. In 2010 it returned \$32 million to its shareholders when it sold off Pan Andean Resources; Clontarf's predecessor in South America. Clontarf Energy is listed on AIM (Ticker: CLON).

Strategy

- Focus on existing and new high potential exploration opportunities in South America and Africa.
- The principal is to marry geological risk against political uncertainty.
- Use our expertise in oil and gas exploration in remote areas.
- Work with partners to increase added value to shareholders.

Management

John Teeling – Executive Chairman – Has 45 years' resource experience. In South America since 1988. Established over 10 AIM resource companies.

David Horgan – Director – Over 25 years' experience in the oil & gas sector in South America.

Jim Finn – Finance Director – 25 years' experience in exploration companies.

Clontarf Focus

Latin America

There are more than 350 Bn boe of conventional reserves already discovered but more than 60% of the prospective area remains unexplored. Many basins are under-explored and new ideas are emerging. Clontarf Energy has focused on the Andean belt: Peru, Colombia and Bolivia are the countries of focus.

Africa

Africa has more than 330 Bn boe of conventional reserves discovered. 50% of Sub Saharan Africa is unexplored. Clontarf Energy is identifying emerging ideas and focusing on West Africa: Ghana and neighbours, Nigeria and Cameroon.

Operations

Ghana: Rights close to the Discoveries

Over 2 billion barrels have been discovered in Ghana since 2005. Ghana is amongst the most attractive exploration locations in the world. The current terms are: Royalty: 12.5% for oil; Carry: 10%, and; Income Tax: 35%. The Tano 2A Block is held 60% by Clontarf Energy, 30% Petrel Resources and 10% Ghanaian interests.

Our Strengths

- Prospective exploration acreage in Ghana, Clontarf Energy has 60% of Tano 2A block close to Tullow finds.
- Petroleum Agreement
- Stakes in two gas producing fields in Bolivia
- Experienced Team

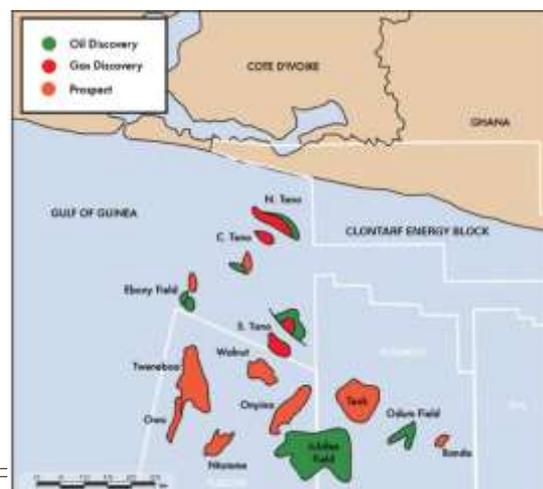

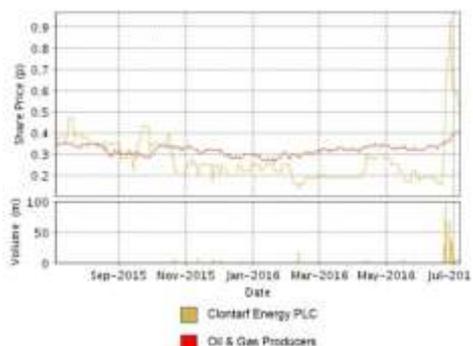

Key Facts

Market Cap: £2.2 million

Shares Issued: 454 million

Listed: AIM: 6 April 2011

Year End: 30 June

Peru: 3% Production Royalty

Leading Swiss/Uruguayan agri-group, Union, operate Peruvian Block 183. The block is prospective for gas and condensate with a growing local market. Block 183 covers 396,826 hectares in the Marañon Basin, which has produced oil and gas since the 1940s. Two oil fields and one gas field are on adjacent blocks. Good quality, recently re-processed seismic data is available. Clontarf Energy already has identified leads & prospects

Bolivia:

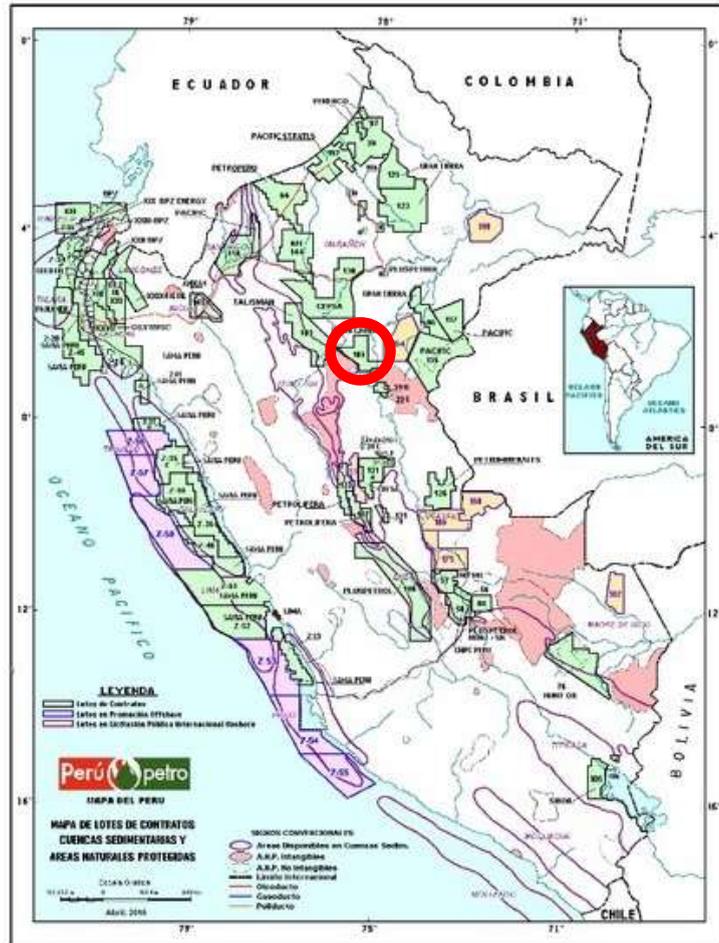

Despite the uncertain political situation the economy is growing, powered by commodity exports, including strong gas demand in Brazil & Argentina. Clontarf Energy holds stakes in two proven projects, El Dorado and Monteagudo (both on existing export pipelines). A gas nationalisation decree has plunged this into doubt.

Monteagudo (30% Clontarf, 50% Repsol-YPFB, 20% Petrobras).

This is a traditional field producing c. 120 bod. The potential is the deep gas play, estimated to be 3 tcf; identified by 3D seismic and identical to nearby multi-tcf discoveries.

El Dorado (10% Clontarf 90% YPFB)

This is a producing gas field near Santa Cruz. These wells are now producing c. 19mmcf/d & 500bd condensate. Planned production is c.40mmcf/d & 800 barrels condensate – yielding gross revenues of over \$200k daily.

Oil & Gas Market

Markets are nervous since much production is in unstable places and over-capacity has shrunk from 5 million to under 1 million barrels. Global oil demand growth is c. 2% yearly. Long term gas demand growth is over 2%. Surplus capacity has shrunk dramatically since 2000 – though unconventional resources have surged.

There has never been a better opportunity for junior oil & gas explorers
